WORK EXPERIENCE

Accenture

Toronto, Canada

AI Automation Engineer | Logistics — Mar 2026 – Present

- Architecting an AI-assisted Playwright pipeline for an enterprise logistics web app, automating high-value regression cases.
- Building an Agent Skill with LLM orchestration that pulls User Stories, acceptance criteria, and test steps from Azure DevOps to auto-generate Playwright scripts—cutting per-script authoring from 15–30 min to 5 min (5x faster).
- Streamlining testing and PR review gates by configuring automated CI runs and review agents, reducing flaky tests and flagging incoherent test steps against acceptance criteria.

Quality Automation Engineer / Cloud Engineer | Transportation — Jun 2023 – Nov 2025

- Administered 3 Azure environments (test, pre-prod, prod) for a transportation platform, executing and mapping 800+ test cases across the release pipeline.
- Led incident triage and DR exercises aligned to RTO/RPO targets, maintaining 10+ runbooks and coordinating stakeholder notifications across infrastructure, security, and application teams.
- Built an automation tool that cut test case documentation time by 70% and lifted testing efficiency by 40% across cross-functional teams.
- Created an MVP Gen-AI Knowledge Transfer Bot answering FAQs and surfacing reference sheets for new joiners.

Program Management & App Dev | Banking & IT — Jun 2022 – Jun 2023

- Banking: Owned onboarding/offboarding for a 200+ resource engagement at peak.
- Built Power Automate/PowerApps tooling that streamlined PMO workflows, improving efficiency by 50–75%.

PROJECTS

relearn.ing — <https://relearn.ing>

Personal digital sandbox and content platform documenting journals and projects built with new technologies and AI. Built with Astro, React, and TypeScript on a high-performance static architecture with zero-cost infrastructure and sub-second load times.

Social Fan-Out Pipeline — <https://relearn.ing/projects/social-fanout-pipeline>

Serverless event-driven architecture (Google Cloud Workflows, Pub/Sub, Eventarc, Cloud Functions) distributing content from a single git push to LinkedIn and Threads with zero long-lived keys.

CERTIFICATIONS

Google Professional Cloud DevOps Engineer; Google Professional Security Operations Engineer; Google Professional Cloud Architect; Microsoft Azure Developer (AZ-204); AI Fundamentals (AI-900); Azure Fundamentals (AZ-900); AWS Certified Cloud Practitioner

EDUCATION

Far Eastern University

2014 – 2017

BS, Clinical Laboratory Science / Medical Technology

Manila, Philippines

Pivoted from Medical Technology into cloud engineering via multi-cloud certifications (GCP, Azure, AWS).

SKILLS

GCP (Pro DevOps, SecOps, Architect); Azure (AZ-204); AWS (Cloud Practitioner); Python; TypeScript; React; Node.js; Docker; Playwright; GitHub Actions; CI/CD; Cloud Operations; QA Automation; Power Automate; Incident Triage; Runbooks; GenAI Tooling; Agentic Workflows
